

Ceiling fitting light P 37

Image: Ceiling fitting light P 37 – ITINO

Inside, the powder-coated casing of the built-in light fitting the internal wiring, sockets, light bulb and the lamp operating device (electronic ballast) are situated. The lamp cover consists of two spherical caps with holding sheets, two aluminium profiles, one opal polycarbonate cover of the light emitting profile and the lamellae cascade.

Areas locates next to the light, can be illuminated through the lamellae cascade.
